

presents its new design!!!

EXPERT 2K-FA

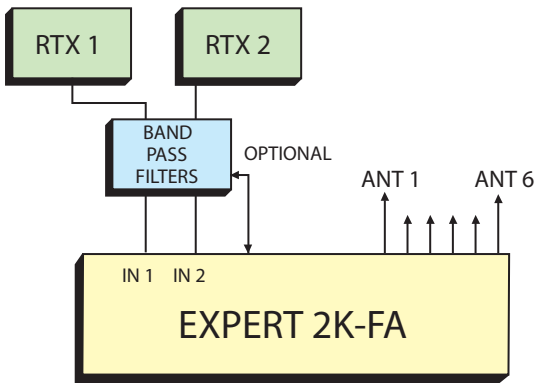

The most advanced solid state automatic linear amplifier in the world focused for a very high quality amateur's station.

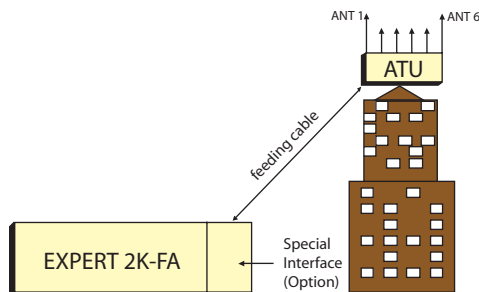

The operator has only to move the frequency tuning knob on the Transceiver.

It starts from the 1K-FA's features but with much much more!

- Double the power output of the 1K-FA.
- The only solid state linear amplifier delivering this power on 50 Mhz.
- 6 selectable antennas.
- Continuous operation.
- Capable of driving an external set of band pass filters, for a perfect SO2R or multi station operation for Contests and DXpeditions.

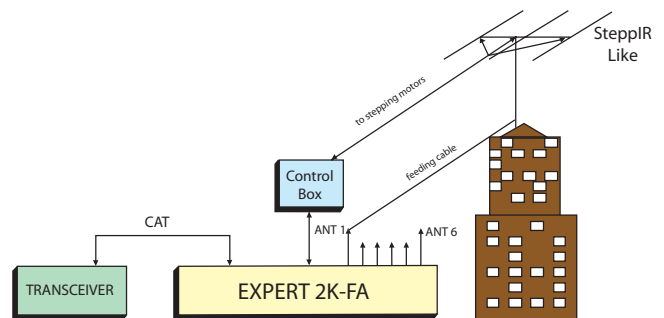

- Automatic tuner remotable on the roof (option), you can automatically manage up to 6 antennas with just one coaxial cable feed.

- USB port for PC control and downloading upgrades.

- Advanced switching power supply with automating Power Factor Correction (according to the new EU's rules).
- Possibility to drive directly all tuneable antennas, such as the SteppIR.

- Dimensions: w38xh18xd42 cm. (connectors included)
- Weight: around 20 Kg.
- Availability: the end of 2009.
